

BS00097 CIP 2

U.S. Application No. 10/801,222 Examiner CHOW, Art Unit 2645  
Response to March 28, 2006 Office Action

**LISTING OF THE CLAIMS**

[c01] (Original) A method of providing communications services, comprising the steps of:

allowing a subscriber to create a data message;  
allowing the subscriber to associate the data message to an originating party and to a recipient;  
receiving a communication from the originating party; and  
communicating the data message to the recipient via an Internet Protocol communications network.

[c02] (Original) A method according to claim 1, wherein the step of receiving the communication comprises receiving a telephone call intended to terminate at a telephone number associated with the subscriber.

[c03] (Original) A method according to claim 1, wherein the step of receiving the communication comprises receiving an electronic communication addressed to the subscriber.

[c04] (Original) A method according to claim 1, wherein the step of allowing the subscriber to create the data message comprises allowing the subscriber to create an audio message.

[c05] (Original) A method according to claim 1, wherein the step of allowing the subscriber to create the data message comprises allowing the subscriber to access a user interface via an Internet Protocol communications network, the user interface prompting the subscriber to create the data message and to associate the data message to a recipient.

[c06] (Original) A method according to claim 1, wherein the step of allowing the subscriber to create the data message comprises allowing the subscriber to specify a time of day that the data message is communicated to the recipient.

BS00097 CIP 2

U.S. Application No. 10/801,222 Examiner CHOW, Art Unit 2645  
Response to March 28, 2006 Office Action

- [c07] (Original) A method according to claim 1, further comprising the step of allowing the subscriber to preview the data message.
- [c08] (Original) A method according to claim 7, further comprising the step of allowing the subscriber to audibly preview the data message.
- [c09] (Original) A method according to claim 7, further comprising the step of allowing the subscriber to visually preview the data message.
- [c10] (Original) A method according to claim 1, further comprising the step of allowing the subscriber to attach a computer file to the data message.
- [c11] (Original) A method according to claim 1, wherein the step of allowing the subscriber to create the data message comprises allowing the subscriber to record audio content.
- [c12] (Original) A method according to claim 1, wherein the step of allowing the subscriber to create the data message comprises allowing the subscriber to input text.
- [c13] (Original) A method according to claim 1, further comprising the step of accepting voice commands from the subscriber when creating the data message.
- [c14] (Previously Presented) A method of providing communications services, comprising the steps of:

storing a user interface in memory, the user interface allowing a first party to compose a data message and to associate that data message with a second party and with a third party;

receiving a communication from the second party; and  
communicating the data message to the third party.

U.S. Application No. 10/801,222 Examiner CHOW, Art Unit 2645  
Response to March 28, 2006 Office Action

[c15] (Previously Presented) A method according to claim 14, wherein the step of receiving the communication comprises receiving a telephone call intended to terminate at a telephone number associated with the first party.

[c16] (Previously Presented) A method according to claim 14, wherein the step of receiving the communication comprises receiving an electronic communication addressed to the first party.

[c17] (Previously Presented) A method according to claim 14, further comprising the step of allowing the first party to preview the data message.

[c18] (Previously Presented) A method according to claim 14, further comprising the step of allowing the first party to attach a file to the data message.

[c19] (Previously Presented) A method according to claim 14, further comprising the step of allowing the first party to record audio content for the data message.

[c20] (Previously Presented) A system, comprising:

a Communications Module stored in a memory device, and a processor communicating with the memory device;

the Communications Module allowing a first party to compose a data message and to associate that data message with a second party and with a third party, and when a communication from the second party is received, the Communications Module initiates communication of the data message to the third party.

[c21] (Previously Presented) A computer program product, comprising:

a computer-readable medium; and

BS00097 CIP 2

U.S. Application No. 10/801,222 Examiner CHOW, Art Unit 2645  
Response to March 28, 2006 Office Action

a Communications Module stored on the computer-readable medium, the Communications Module allowing a first party to compose a data message and to associate that data message with a second party and with a third party, and when a communication from the second party is received, the Communications Module initiates communication of the data message to the third party.
